

**OUR DEVELOPMENT PHASE  
EMITTED APPROXIMATELY**

**1335KG CO<sub>2</sub>**

**115KG FROM TOOLS  
AND EQUIPMENT**

**1210KG FROM  
TRANSPORT**

This calculation does not include carbon emissions from land-use change, project partners' operations, or catering at events. We endeavour to be fully transparent about our impact, and to improve the accuracy of our carbon reporting as the initiative develops.

Our team worked hard to minimise the project emissions wherever possible. Some of the ways we did this included:

**USING E-BIKES AND  
ACTIVE TRAVE**

**USING LOCAL SUPPLIERS  
FOR FOOD AND MATERIALS**

**MINIMISING  
PLASTIC USE**

**CAR SHARING**

**HYBRID MEETINGS**

**CLIMATE ACTION  
WORKSHOPS**

**REUSING  
MATERIALS**

**ATTENDING CLIMATE  
TRAINING**

**BROOKSIDE  
RESTORATION**
